Connecting to the Rovernet WPA2 Secured Wireless Network with the Droid (Android 2.x OS)

Configuring your wireless device to use WPA2 takes a few minutes. You will, however, need to meet the following system requirements in order to connect to the MichiganTech WPA2 Secured Wireless Network.

**Minimum System Requirements**

- Be within the “MichiganTech” SSID wireless coverage areas.
- Be a current Michigan Tech student, faculty, or staff member.
- Have a valid ISO User Name and Password.
- Have an 802.11 b/g/n compatible mobile device capable of WPA security.

**Adding and Configuring the “MichiganTech” SSID**

2. Make sure your Wi-Fi connection is turned on and navigate to Wi-Fi settings.
3. Select “MichiganTech” from the list of Wi-Fi Networks.

If the “MichiganTech” SSID is not in your list, you are not within range of a “MichiganTech” secured wireless access point.

4. If prompted, enter and confirm your Droid Credentials Storage password.

This is not the password you will use for accessing Rovernet. The Credential Storage Password is actually a key your device uses to encrypt passwords that your phone stores for you. If you need to set up your Droid Credential Storage Password, make sure it is a strong password and that it is different than your Michigan Tech ISO password.
5. When prompted, fill in the information as shown below:

![Connect to MichiganTech](image)

- a. Select **PEAP** for the **EAP method**.
- b. Select **MSCHAPV2** for the **Phase 2 authentication**.
- c. Enter your **ISO User name** in the **Identity** field.
- d. Enter your **ISO Password** in the **Wireless Password** field.

6. Touch **Connect**.

![Connected](image)

Initially the screen will report “Obtaining IP address from MichiganTech.” When your phone is connected to the network, the wireless indicator icon appears in the status bar. If you are unable to connect, please check to make sure you entered your ISO User name and Password. Refer to the Initial Sign-On (ISO) Site at [www.login.mtu.edu](http://www.login.mtu.edu), if you have forgotten your MTU ISO password.
