Connecting to the Rovernet WPA2 Secured Wireless Network with the iPod Touch

Configuring your wireless device to use WPA2 takes a few minutes. You will, however, need to meet the following system requirements in order to connect to the MichiganTech WPA2 Secured Wireless Network.

Minimum System Requirements

- Be within the “MichiganTech” SSID wireless coverage areas.
- Be a current Michigan Tech student, faculty, or staff member.
- Have a valid ISO User Name and Password.
- Have an 802.11 b/g compatible mobile device capable of WPA2 security.
- Important! Have the iPhone/iPod 2.2.1 (or higher) software update applied.

Adding and Configuring the “MichiganTech” SSID

1. Navigate to Settings.

2. Select Wi-Fi to move to the Wi-Fi Screen.
   a. Make sure that your Wi-Fi connection is turned on.

   **Note:** If the “MTU” SSID is checked, you need to forget this network before you can successfully connect to the Rovernet WPA2 Secured Wireless Network.
b. To forget the MTU network:
   i. Click on the blue arrow to the right of the MTU name.

   ![Image of Wi-Fi Networks settings]

   ii. Click on “Forget This Network”

   ![Image of Forget Network]

   iii. Click Forget Network, when prompted.

   iv. Click on the “Wi-Fi Networks” button to go back to the network listing.
3. To connect to the ‘MichiganTech’ Network:
   a. Select “MichiganTech” from the Choose a Network List. (If the “MichiganTech” SSID is not in your list, you are not within range of a “MichiganTech” secured wireless access point).

   ![Image of iPod Touch Wi-Fi settings]

   b. When prompted, fill in the information as shown below:
      i. Enter your ISO User name in the Username field.
      ii. Enter your ISO Password in the Password field.
      iii. Press the Join button located in the bottom right corner of the display.

   ![Image of iPod Touch entering password]

c. Verify the www.login.mtu.edu Certificate for the “MichiganTech” network by clicking Accept as shown below.

Once the certificate has been accepted, you should be redirected back to the Wi-Fi Networks screen. If you have successfully connected, you will notice a Check Mark next to the “MichiganTech” network.

If you are unable to connect, please check to make sure you entered your ISO User name and Password correctly in step b. Refer to the Initial Sign-On (ISO) Site at www.login.mtu.edu, If you have forgotten your MTU ISO password.
